The most intuitive coworking software

Press Kit | 2023

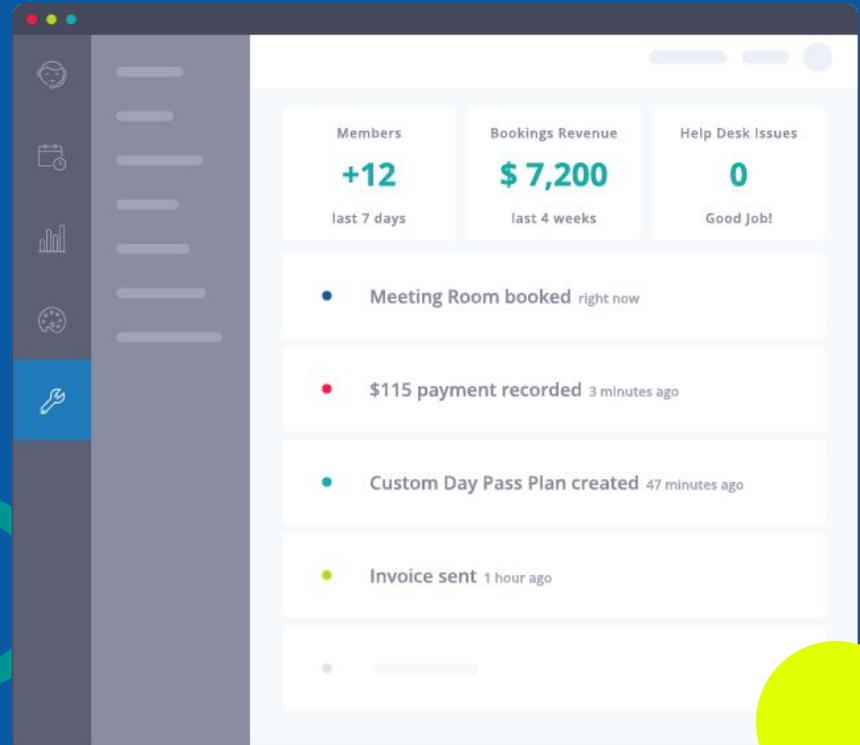

**cobot**

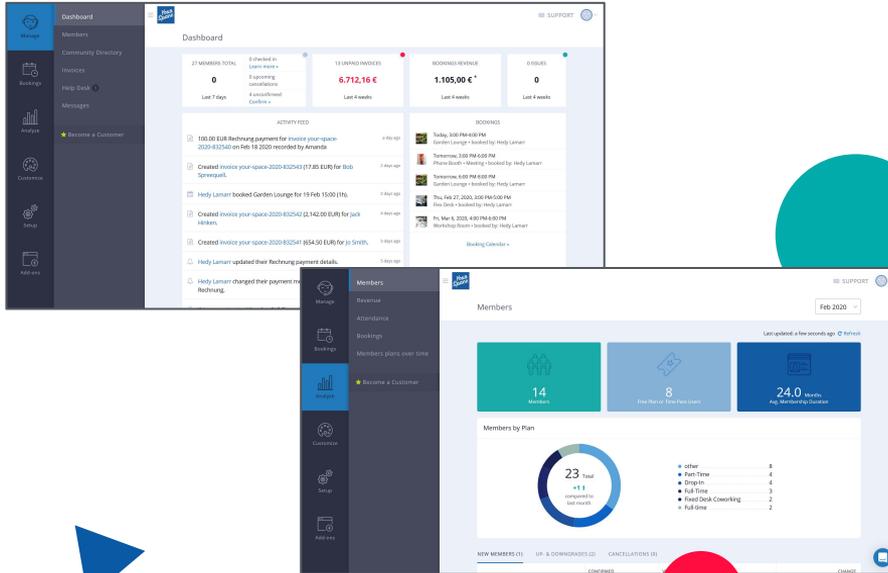

# What is Cobot?

We offer management software for coworking spaces, flexible workspaces, & office hubs worldwide.

Cobot is designed to handle administrative tasks and support the most powerful integrations for coworking and flexible workspaces with ease.

It's the one tool to unite your solutions and help you take back your time for what really matters – time with your coworkers.

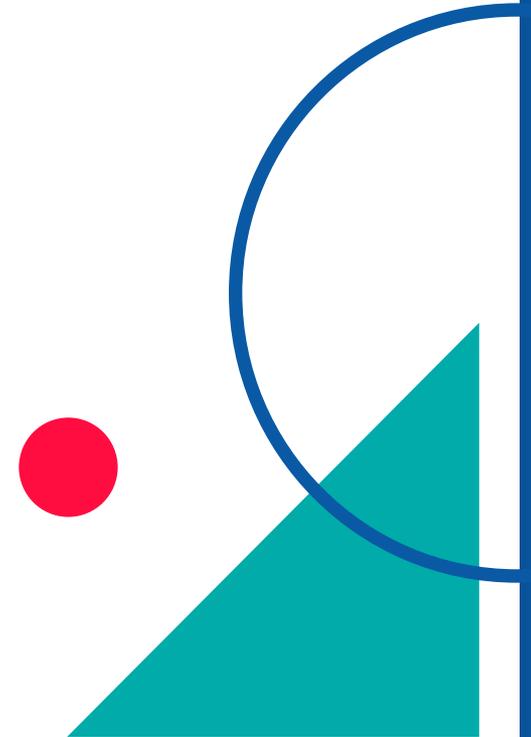

# The Cobot Story

Cobot is a web-based management software designed for the unique needs of coworking spaces. The software was originally designed to help two of our founders, Thilo Utke and Alex Lang, manage their own coworking space co.op.

Driven by interest, we began offering Cobot as a product for other coworking spaces. Today we help spaces in over 90 countries process \$7,000,000 in revenue and keep over 100,000 members happy – every day!

# Who Makes Cobot?

# Our Team

Our customers know us by our first names and we know them by theirs. We take care of everything in-house and put our customers' success front-and-center.

# Why Cobot

The core principle of Cobot is ease of use.

Cobot is not a generic ERP, billing, or CRM system. It was designed for the unique needs of coworking spaces from the ground up. We believe it's better to do a few things excellently than many things decently.

No matter your size or location, Cobot is designed for your needs. We regularly update the product for local needs and support over ten languages. If there's a feature or integration that we don't offer, we do offer an open, well-documented API.

# The Cobot Values

Cobot is a proud pioneer of the global coworking movement and our values are what got us here. They're why we got involved in coworking in the first place and why we care so much about this movement.

## Community and Collaboration

We believe that workplaces must center human connection. Communities thrive when we practice collaboration, solidarity, empathy, and participation. We are stronger the more diverse viewpoints and experiences are included and can have an impact.

## Trust and Ownership

We work best when we are empowered and in control. Everyone is accountable for delivering on their commitments, and can be confident to make a direct impact with their contribution.

## Excellence

We are ambitious in our goals. We strive for excellence in everything we do, be it in our work or how we interact with each other.

## Learning

We believe in lifelong learning, curiosity, and the joy that comes from making progress.

## Sustainability

We acknowledge that the resources of our planet, our community, and ourselves are limited. We treat these resources with respect and find ways to save and protect them. We are here for the long run.
